SKILLS

Languages: C, C++, Java, JavaScript, Python, TypeScript

Technologies/Frameworks: HTML, CSS, Tailwind CSS, PHP, React.js, Node.js, Express.js

Database: MongoDB, MySQL, PostgreSQL

Tools/Platform: Visual Studio code, Figma, XAMPP, Git/Github

Core CS Fundamentals: DBMS, Operating Systems, Computer Networks, SQL, OOPS

TRAINING

OOP Using C++

Jun 2025 - Jul 2025

Lovely Professional University

- Gained hands-on experience in Object-Oriented Programming (OOP) using C++, applying core concepts such as classes, objects, inheritance, polymorphism, and encapsulation to solve real-world problems.
- Developed modular and efficient programs by implementing data abstraction, constructors/destructors, and file handling, improving code reusability and maintainability.
- Strengthened problem-solving and logical thinking skills through practical exercises, mini-projects, and debugging sessions, following industry-standard coding practices.

PROJECTS

Cricket Management System

Oct 2025 - Jan 2026

- Created a web-based Cricket Management System to efficiently manage teams, players, match schedules, and tournament data through centralized, user-friendly platform, improving data organization and efficiency.
- Designed and implemented structured data modules for player profiles, match statistics, and performance records, ensuring high data accuracy, fast info retrieval, and seamless real-time updates across system.
- Improved user engagement and accessibility by responsive interface, manager dashboard for team management, real-time data visualization, and integrated SocketIO based chat system.

Tech: HTML, Tailwind CSS, React.js, Node.js, Express.js, SocketIO, MongoDB

DevOrbit AI Chatbot

Feb 2025 - Mar 2025

- Developed DevOrbit AI Chatbot, an intelligent conversational platform designed to provide real-time assistance, guidance, and automated support through natural language interactions.
- Integrated an AI-powered response engine using the Gemini API, organizing the platform into three core sections Courses, Assignments, and Daily Quizzes to deliver structured, context-aware learning support.
- Designed and integrated a daily assignment generation and tracking system based on enrolled courses, enabling structured practice, consistent learning progression, and personalized feedback for users.

Tech: HTML, CSS, JavaScript, NodeJS, Python(Flask), Gemini API

CERTIFICATIONS

Python Essentials | Cisco Network Academy

Jan 2026 - Feb 2026

Full Stack Development With Mern Stack | Nasscom Foundation

Nov 2025 - Nov 2025

Privacy and Security in Online Social Media | NPTEL

Jul 2025 - Oct 2025

Responsive Web Design | FreeCodeCamp

Oct 2023 - Dec 2023

EDUCATION

Lovely Professional University

2023 - Present

Bachelor of Technology - Computer Science and Engineering CGPA: 6.8

Phagwara, Punjab

SCHOLASTIC ACHIEVEMENTS

Achievements

- Solved 300+ coding problems across different platforms (Leet Code, Hacker Rank, Geeksforgeeks).
- Secured Runner-Up position in a college-level Hackathon, demonstrating strong problem-solving skills, teamwork, and the ability to build a functional solution within time constraints.
- Actively contributed as a student volunteer in organizing college technical events and workshops.
- Served as Cricket School Captain, demonstrating leadership, teamwork, and strategic planning abilities.
